

GCSE (9-1) Combined Science (Chemistry) A (Gateway Science) J250/09 Paper 9 (Higher Tier)

Н

Sample Question Paper

Date – Morning/Afternoon

Version 2.1

Time allowed: 1 hour 10 minutes

You must have:

• the Data Sheet

You may use:

- · a scientific or graphical calculator
- a ruler

First name					
Last name					
Centre number			Candidate number		

INSTRUCTIONS

- Use black ink. You may use an HB pencil for graphs and diagrams.
- Complete the boxes above with your name, centre number and candidate number.
- Answer all the questions.
- Write your answer to each question in the space provided.
- Additional paper may be used if required but you must clearly show your candidate number, centre number and question number(s).
- Do not write in the bar codes.

INFORMATION

- The total mark for this paper is 60.
- The marks for each question are shown in brackets [].
- Quality of extended responses will be assessed in questions marked with an asterisk (*).
- This document consists of 20 pages. Any blank pages are indicated.

SECTION A

Answer **all** the questions.

You should spend a maximum of 20 minutes on this section.

1	What is the best explanation of a strong acid?	
	A The acid is completely ionised in solution in water.	
	B The acid is partially ionised in solution in water.	
	C There is a large amount of acid and a small amount of water.	
	D There is a small amount of acid and a large amount of water.	
	Your answer	[1]
2	Look at the diagram.	
	It shows a structure of carbon.	
	Which structure of carbon is shown in the diagram?	
	A Diamond	
	B Fullerene	
	C Graphene	
	D Graphite	
	Your answer	[1]

		<u> </u>	
3	Wh	at is the approximate radius of an atom in metres?	
	Α	3×10^{-13}	
	В	0.003×10^{-7}	
	С	0.3×10^{-5}	
	D	0.03×10^{-1}	
	Υοι	ır answer	[1]
4	Нус	lrogen reacts with fluorine to make hydrogen fluoride. H—H + F—F → 2H—F	

 Bond
 Bond energy in kJ/mol

 H—H
 436

 F—F
 142

 H—F
 568

Look at these bond energies.

What is the energy change for the reaction between hydrogen and fluorine?

- **A** -558 kJ/mol
- B -10 kJ/mol
- **C** +10 kJ/mol
- **D** +558 kJ/mol

Your answer [1]

- 5 100 cm³ of a solution of 1 mol/dm³ sodium hydroxide is added to 100 cm³ of a solution of 1 mol/dm³ hydrochloric acid.
 - The maximum rise in temperature recorded was T₁.

The experiment is repeated with 50 cm³ of each solution.

• The maximum rise in temperature recorded was T₂.

Which statement about temperatures T_1 and T_2 is true?

A T_1 is equal to T_2

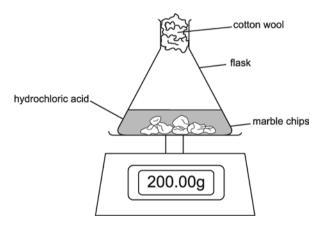

- **B** T_1 is half the value of T_2
- \mathbf{C} T_2 is half the value of T_1
- **D** T_2 is a quarter the value of T_1

Your answer

[1]

6 Look at the diagram.

It shows how the reaction between hydrochloric acid and marble chips (calcium carbonate) can be monitored.

The reading on the balance **decreases** during the reaction.

Which statement is the **best** explanation?

- A Acid escapes from the flask.
- **B** Carbon dioxide gas is made which leaves the flask.
- C Hydrogen gas is made which leaves the flask.
- **D** The temperature in the laboratory changes.

Your answer [1]

1	A solution of lead filtrate, $PD(NO_3)_2(aq)$ has a concentration of 66.24 g/dm ² .	
	The relative formula mass, $M_{\rm r}$, of lead(II) nitrate is 331.2.	
	What is the concentration, in mol/dm ³ , of this solution?	
	A $2.0 \times 10^{-4} \text{ mol/dm}^3$	
	B $2.0 \times 10^{-2} \text{ mol/dm}^3$	
	C $2.0 \times 10^{-1} \text{ mol/dm}^3$	

Your answer			[1]

8 Which row in the table shows the correct results for an ionic compound?

D $5.0 \times 10^{-1} \text{ mol/dm}^3$

	Solid compound	Compound dissolved in water	Molten compound
Α	conducts	does not conduct	conducts
В	conducts	conducts	conducts
С	conducts	conducts	does not conduct
D	does not conduct	conducts	conducts

Your answer		
Your answer		

9 The empirical formula of a compound Y is CH₂O.

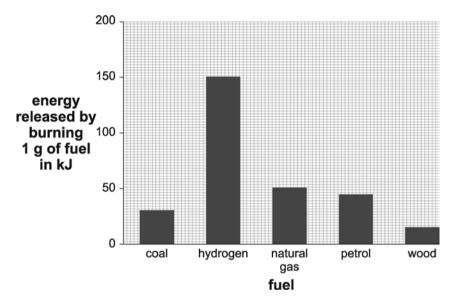

Compound Y has a relative formula mass of 90.

What is the molecular formula of compound Y?

- $A C_2H_2O_4$
- $\mathbf{B} \quad \mathsf{C}_3\mathsf{H}_6\mathsf{O}_3$
- $C C_4 H_{10} O_2$
- $D C_6H_{12}O_6$

Your answer [1]

The bar chart shows the amount of energy released when 1.0 g of each fuel is completely combusted.

What mass of natural gas is needed to release the same amount of energy as 1.0 g of hydrogen?

- **A** 3.0 g
- **B** 3.3 g
- **C** 6.0 g
- **D** 10.0 g

Your answer [1]

7 BLANK PAGE

TURN OVER FOR THE NEXT QUESTION

SECTION B

Answer **all** the questions.

11 Look at the table of data.

Material	Strength (arbitrary units)	Resistance to corrosion	Density (g/cm ³)	Electrical conductivity	Cost (£ per tonne)
Aluminium	222	Good	2.8	Very good	750
Titanium alloy	850	Good	4.4	Good	8000
Carbon-fibre- reinforced-polymer	2457	Good	1.5	Very good	10000
Steel	254	Poor	7.8	Good	65
PVC	69	Good	1.3	Poor	490

	(a) *	A chair	manufacturer	is	making	а	garden	chair.
--	-------	---------	--------------	----	--------	---	--------	--------

The manufacturer needs to decide which material to	use 1	to make	tne cr	naır
--	-------	---------	--------	------

Some of the materials are metals and some are polymers.

Describe and compare the bonding of the materials in the table and suggest which of them would be best for making the chair, giving reasons for your answer.

(b)	A car designer is discussing the material to use in a new car.					
	car designer	I think that we should use carbon-fibre-reinforced-polymer instead of steel for some of the body panels in the				
	Discuss the arguments for and against the use of carbon-fibre-reinforced-polymer instead of steel for car body panels.					
	Use information from the table.					
		[3]				
(c)	Power companies	use aluminium wire for over-head power cables.				
	What are the two r	most important properties of aluminium for this use?				
	Use information from	om the table.				
		[2]				
(d)	Some of the mater	ials are alloys.				

What is an alloy?

12 Look at the diagrams in Fig 12.1.

They show apparatus for different separating techniques.

They are not to the same scale.

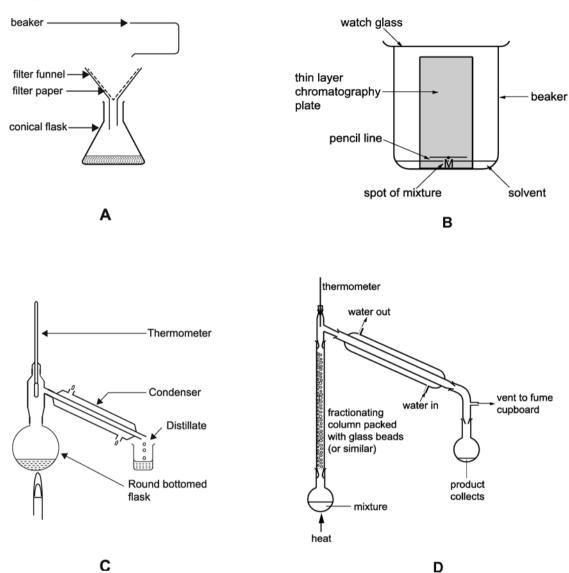

Fig 12.1

(a) What is the name of the separating technique used in diagram **D**?

(b) Lead nitrate solution is added to sodium sulfate solution.

A white precipitate is formed.

Explain how a pure sample of the precipitate can be separated from the mixture.

							 	[3]
Refer	to one (of the dia	agrams II	n Fig 12.	1 in your	answer.		

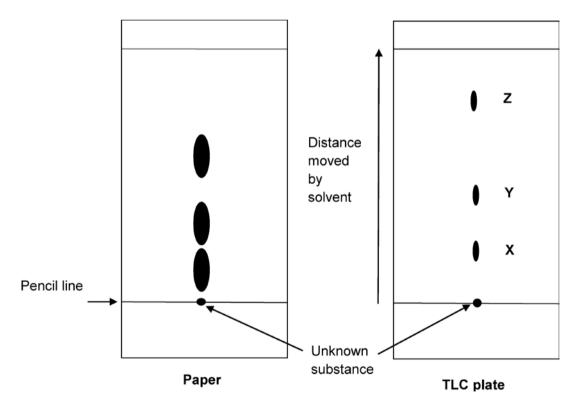

(c) Two scientists investigate an unknown substance.

One scientist uses apparatus **B** in Fig 12.1.

Another scientist uses the same apparatus but uses a thin layer chromatography (TLC) plate instead of paper.

Both scientists put an unknown substance on the centre of the pencil line.

Look at the results.

	12
(i)	Use the thin layer chromatogram to work out the $R_{\rm f}$ value for substance ${\bf Y}$.
	Answer =[2]
(ii)	Suggest two reasons why TLC might be better than paper chromatography.
	[2]

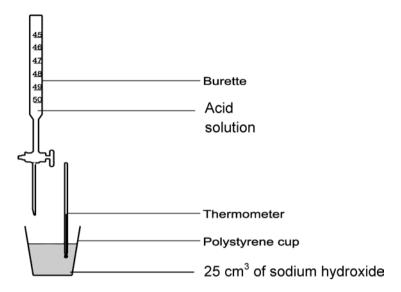

13

Thi	s question is about making copper.	
(a)	Copper is made using a displacement reaction.	
	 Magnesium is added to copper sulfate solution, CuSO₄. 	
	 Copper and magnesium sulfate solution, MgSO₄, are made. 	
	Write a balanced symbol equation for this reaction.	
		. [1]
(b)	(i) In the reaction, magnesium atoms become magnesium ions, Mg ²⁺ , and copper ions, Cu ²⁺ , become copper atoms.	
	Write a balanced ionic equation for this reaction.	
		. [2]
	(ii) Write a balanced half equation to show what happens to magnesium in this reaction.	
	Use e ⁻ to represent an electron.	
		. [2]
(c)	Explain why this displacement reaction is also a reduction/oxidation reaction.	
	Use ideas about electrons in your answer.	
		[3]

			• •							
14	(a)	The	mass number of an element is 23.							
		The	e atomic number of the same element is 11.							
		(i)	How many protons and how many neutrons are there in an atom of this element?							
			Number of protons =							
			Number of neutrons =	[2]						
		(ii)	This element forms an ion with a charge of 1+.							
			Work out the number of electrons in an ion of this element.							
			Answer =	[1]						
	(b)	And	Another element has an atomic number of 17.							
		Cal	culate the mean mass of one atom of this element.							
		Giv	e your answer to three significant figures.							
		•	The Avogadro constant is 6.022×10^{23} atoms/mol.							
			Answer =g	[2]						
	(c)	Ele	ment Z has the electronic structure 2.8.8.1.							
		Hov	w you can tell that the element is potassium?							
			[[1]						

15 A scientist investigates an acid solution.

Look at the diagram of the apparatus the scientist uses.

(a) (i) The scientist adds universal indicator to the sodium hydroxide solution.

What colour is the universal indicator in the sodium hydroxide solution?

[1]

(ii) Universal indicator is a mixed indicator.

Name a single indicator.

.....[1]

(b) The scientist adds acid in 5 cm³ volumes to the sodium hydroxide solution.

After each addition, the scientist measures the temperature of the reaction mixture.

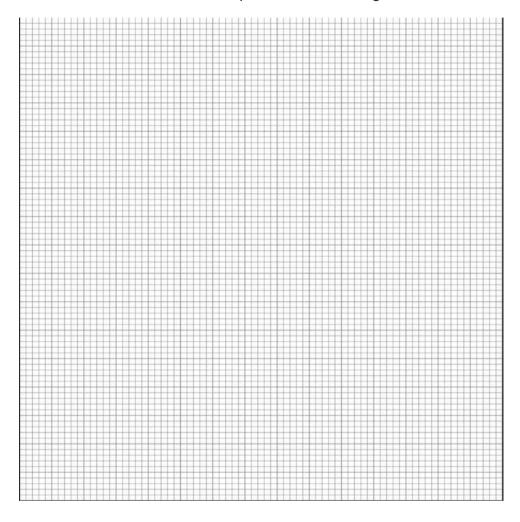

Look at the table of results. One of the results is anomalous.

Volume of acid added (in cm ³)	Temperature (in °C)
0	23
5	27
10	35
15	41
20	44
25	43
30	42
35	37
40	33
45	36
50	28

(i) Plot these results on the grid provided.

Draw two intersecting lines of best fit.

- One line shows the temperature increasing.
- One line shows the temperature decreasing.

16	Magnesium sulfate can be made by reacting magnesium carbonate with sulfuric acid.
	The reaction is shown in the equation below.
	$\mathrm{MgCO_3}$ + $\mathrm{H_2SO_4}$ \rightarrow $\mathrm{MgSO_4}$ + A + $\mathrm{H_2O}$
	(a) (i) What is represented in the equation by A?
	A:[1]
	(ii) Give the test for substance A
	[1]
	(b) What is the maximum mass of magnesium sulfate that could be formed when 6.72 g of magnesium carbonate is reacted with sulfuric acid?

Answer =g [5]

END OF QUESTION PAPER

GCSE (9-1) Combined Science (Chemistry) A (Gateway Science) J250/09 Paper 9 (Higher Tier)

SAMPLE MARK SCHEME

Duration: 1 hour 10 minutes

MAXIMUM MARK

This document consists of 16 pages

MARKING INSTRUCTIONS

PREPARATION FOR MARKING

SCORIS

- 1. Make sure that you have accessed and completed the relevant training packages for on-screen marking: scoris assessor Online Training; OCR Essential Guide to Marking.
- 2. Make sure that you have read and understood the mark scheme and the question paper for this unit. These are posted on the RM Cambridge Assessment Support Portal http://www.rm.com/support/ca
- 3. Log-in to scoris and mark the **required number** of practice responses ("scripts") and the **required number** of standardisation responses.

YOU MUST MARK 10 PRACTICE AND 10 STANDARDISATION RESPONSES BEFORE YOU CAN BE APPROVED TO MARK LIVE SCRIPTS.

MARKING

- 1. Mark strictly to the mark scheme.
- 2. Marks awarded must relate directly to the marking criteria.
- 3. The schedule of dates is very important. It is essential that you meet the scoris 50% and 100% (traditional 50% Batch 1 and 100% Batch 2) deadlines. If you experience problems, you must contact your Team Leader (Supervisor) without delay.
- 4. If you are in any doubt about applying the mark scheme, consult your Team Leader by telephone, email or via the scoris messaging system.

- Work crossed out:
 - a. where a candidate crosses out an answer and provides an alternative response, the crossed out response is not marked and gains no marks
 - b. if a candidate crosses out an answer to a whole question and makes no second attempt, and if the inclusion of the answer does not cause a rubric infringement, the assessor should attempt to mark the crossed out answer and award marks appropriately.
- 6. Always check the pages (and additional objects if present) at the end of the response in case any answers have been continued there. If the candidate has continued an answer there then add a tick to confirm that the work has been seen.
- 7. There is a NR (No Response) option. Award NR (No Response)
 - if there is nothing written at all in the answer space
 - OR if there is a comment which does not in any way relate to the question (e.g. 'can't do', 'don't know')
 - OR if there is a mark (e.g. a dash, a question mark) which isn't an attempt at the question.

Note: Award 0 marks – for an attempt that earns no credit (including copying out the question).

- 8. The scoris **comments box** is used by your Team Leader to explain the marking of the practice responses. Please refer to these comments when checking your practice responses. **Do not use the comments box for any other reason.**If you have any questions or comments for your Team Leader, use the phone, the scoris messaging system, or email.
- Assistant Examiners will send a brief report on the performance of candidates to their Team Leader (Supervisor) via email by the end of the
 marking period. The report should contain notes on particular strengths displayed as well as common errors or weaknesses. Constructive
 criticism of the question paper/mark scheme is also appreciated.

10. For answers marked by levels of response:

Read through the whole answer from start to finish, using the Level descriptors to help you decide whether it is a strong or weak answer. The indicative scientific content in the Guidance column indicates the expected parameters for candidates' answers, but be prepared to recognise and credit unexpected approaches where they show relevance. Using a 'best-fit' approach based on the skills and science content evidenced within the answer, first decide which set of level descriptors, Level 1, Level 2 or Level 3, best describes the overall quality of the answer. Once the level is located, award the higher or lower mark:

The higher mark should be awarded where the level descriptor has been evidenced and all aspects of the communication statement (in italics) have been met.

The lower mark should be awarded where the level descriptor has been evidenced but aspects of the communication statement (in italics) are missing.

In summary:

The skills and science content determines the level.

The communication statement determines the mark within a level.

11. Annotations

Annotation	Meaning
DO NOT ALLOW	Answers which are not worthy of credit
IGNORE	Statements which are irrelevant
ALLOW	Answers that can be accepted
()	Words which are not essential to gain credit
_	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

12. Subject-specific Marking Instructions

INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

The breakdown of Assessment Objectives for GCSE (9–1) in Combined Science A (Gateway Science):

	Assessment Objective				
AO1	Demonstrate knowledge and understanding of scientific ideas and scientific techniques and procedures.				
AO1.1	Demonstrate knowledge and understanding of scientific ideas.				
AO1.2	Demonstrate knowledge and understanding of scientific techniques and procedures.				
AO2	Apply knowledge and understanding of scientific ideas and scientific enquiry, techniques and procedures.				
AO2.1	Apply knowledge and understanding of scientific ideas.				
AO2.2	Apply knowledge and understanding of scientific enquiry, techniques and procedures.				
AO3	Analyse information and ideas to interpret and evaluate, make judgements and draw conclusions and develop and improve experimental procedures.				
AO3.1	Analyse information and ideas to interpret and evaluate.				
AO3.1a	Analyse information and ideas to interpret.				
AO3.1b	Analyse information and ideas to evaluate.				
AO3.2	Analyse information and ideas to make judgements and draw conclusions.				
AO3.2a	Analyse information and ideas to make judgements.				
AO3.2b	Analyse information and ideas to draw conclusions.				
AO3.3	Analyse information and ideas to develop and improve experimental procedures.				
AO3.3a	Analyse information and ideas to develop experimental procedures.				
AO3.3b	Analyse information and ideas to improve experimental procedures.				

SECTION A

Question	Answer	Marks	AO element	Guidance
1	Α	1	1.2	
2	D	1	1.1	
3	В	1	1.1	
4	Α	1	2.1	
5	Α	1	2.2	
6	В	1	1.2	
7	В	1	2.1	
8	D	1	1.1	
9	В	1	2.1	
10	Α	1	2.2	

SECTION B

Question	Answer	Marks	AO element	Guidance	
Question 11 (a)*	Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question. Level 3 (5–6 marks) Describes the bonding of both materials AND Makes a comparison AND Makes a choice with a justified reason There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated. Level 2 (3–4 marks) Describes the bonding of both materials OR Describes the structure of one material AND makes a choice with a justified reason There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence. Level 1 (1–2 marks) Describes the bonding of one material	Marks 6		AO1.1: Knowledge of bonding in metals and polymers Bonding in polymers: Covalent bonds in molecule/Macromolecule. Weak intermolecular forces. Some have cross linkages. Bonding in metals: Cationic lattice. Free/mobile pool of electrons. Comparison Polymers are weaker because intermolecular forces are weaker than metallic bonds. Metals conduct electricity because of free electrons. AO3.2a: Analyse information in the table to make judgements Not carbon-fibre-reinforced-polymer – too expensive. Aluminium – strong, corrosion resistant, low density so easy to carry but quite expensive.	
	OR makes a choice with a justified reason			 Steel – strong, cheap but higher density so heavy to carry, corrodes/rusts but can be 	

Question	Answer	Marks	AO element	Guidance
	There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant. O marks No response or no response worthy of credit.			 painted to make look better and resist corrosion. PVC – corrosion resistant, low density means cost per chair is low, easy to carry, easy to shape, may not be strong enough. Titanium - strong, corrosion resistant, fairly low density but very expensive.
(b)	Against Carbon-fibre-reinforced-polymer very expensive (so only used in luxury cars) (1) For Any two from Carbon-fibre-reinforced-polymer stronger than steel/ORA (1) Carbon-fibre-reinforced-polymer lower density/ORA (1) Carbon-fibre-reinforced-polymer has better corrosion	3	3.1b x 3	Must have an argument for and against for full marks. ALLOW carbon-fibre-reinforced-polymer would be no good for crumple zones ALLOW carbon-fibre-reinforced-polymer's lower density will result in
	resistance/ORA (1)			better fuel economy
(c)	Conduction of electricity (1) Low density/corrosion resistance (1)	2	3.2b x 2	
(d)	Mixture of a metal and other element(s)/mixture of two or more metals (1)	1	1.1	

Qı	Question		Answer	Marks	AO element	Guidance	
12	(a)		Fractional distillation	1	1.2	DO NOT ALLOW distillation	
	(b)		(Use apparatus A) Filter / pour the mixture in the funnel, liquid runs through into conical flask (1) Wash precipitate with distilled water (1) Dry the precipitate (1)	3	1.2	ALLOW AW throughout	
	(c)	(i)	Distance moved by spot = 29 mm +/- 2 mm AND distance moved by solvent = 69 mm +/- 2 mm (1) $R_f = 29 \div 69 = 0.42$ (1)	2	1.2	Both distances correct for first mark ECF for R _f value ALLOW values between 0.38 – 0.46	
		(ii)	Any two from Takes less time to separate/solvent moves faster (1) Spots are more distinct/better separated (1) The solvent moves more evenly (1)	2	2.2		

Q	Question		Answer Marks		AO element	Guidance	
13	(a)		$Mg + CuSO_4 \longrightarrow Cu + MgSO_4 (1)$	1	2.1		
	(b)	(i)	Mg + Cu ²⁺ Mg ²⁺ + Cu (2)	2	2.2	ALLOW Mg + Cu ²⁺ (1) (reactants) ALLOW Mg ²⁺ + Cu (1) (products)	
		(ii)	Mg \longrightarrow Mg ²⁺ + 2e ⁻ / Mg - 2e ⁻ \longrightarrow Mg ²⁺ (2)	2	2.2	ALLOW Mg → Mg ²⁺ (1)	
		(c)	Mg loses electrons/Cu gains electrons (1) Mg is oxidised (1) Cu <u>ions</u> are reduced (1)	3	2.1	ALLOW oxidation is loss of electrons and reduction is gain of electrons (1)	

J250/09 Mark Scheme June 20XX

C	Question		Answer		AO element	Guidance	
14	(a)	(i)	Protons = 11 (1) Neutrons = 12 (1)	2	1.1		
		(ii)	10	1	1.1	ECF number of electrons/protons minus 1 (1)	
	(b)		35.5 / 6.022 x 10 ²³ (1) 5.90 x 10 ⁻²³ (g) (1)	2	2.1	1 mark for 5.8950514 x 10 ⁻²³ or correctly rounded but not to 3 sig. fig.	
	(c)		(add up number of electrons) and this is the atomic number (and look up on Periodic Table) (1)	1	1.1	ALLOW has 19 electrons and on the Periodic Table, element number 19 is potassium ALLOW element is in Group 1 and Period 4 DO NOT ALLOW it has 19 electrons on its own	

C	Question		Answer		AO element	Guidance	
15	(a)	(i)	Blue/indigo/violet/purple (1)	1	1.2		
		(ii)	Litmus / phenolphthalein / methyl orange (1)	1	1.2		
	(b)	(i)	Correct labelled axes with appropriate scale so that the graph occupies at least ½ of grid provided (1) Correct plotting of all points to within ½ square (1)	3	2.2		
			Two lines of best fit ignoring anomalous result (1)		3.2a		
		(ii)	21.5 cm ³ (1)	1	3.2b	ALLOW 21 – 22 cm ³	
		(iii)	H⁺ + OH → H₂O	1	1.1		
		(iv)	Any 2 from Measure to higher precision/measure to 1dp (1) Reduce heat loss/put lid on polystyrene cup (1) Add acid in smaller portions / use a temperature probe while adding acid continuously (1)	2	3.3b	DO NOT ALLOW use digital thermometer unless linked to precision	

J250/09 Mark Scheme June 20XX

Question		on	Answer		AO element	Guidance	
16	(a)	(i)	Carbon dioxide (1)	1	1.1		
		(ii)	Turns limewater milky (1)	1	1.2	DO NOT ALLOW ECF Only award the mark if answer to Q16 a(i) is correct.	
	(b)		Relative formula mass of MgCO $_3$ = 84.3 (1) Amount of MgCO $_3$ 6.72 \div 84.3 = 0.0797 (1) Ratio is 1:1 so amount of MgSO $_4$ is also 0.0797 (1) Relative formula mass of MgSO $_4$ = 120.4 (1) Mass of MgSO $_4$ = 0.0797 × 120.4 = 9.6 g (1)	5	2.2	ALLOW 0.08 ALLOW 9.5977 or 9.632	

Summary of updates

Date	Version	Change
May 2018	2	We've reviewed the look and feel of our papers through text, tone, language, images and formatting. For more information please see our assessment principles in our "Exploring our question papers" brochures on our website.
October 2019	2.1	Question 3 - There has been a change to the answer of this question; options were rearranged alphabetically in question paper. Hence, answer has changed from option C to option B.
