Candidate Marks Report

Series: 6 2018

This candidate's script has been assessed using On-Screen Marking. The marks are therefore not shown on the script itself, but are summarised in the table below.

Centre No :	Assessment Code:	H567
Candidate No :	Component Code:	03
Candidate Name :	·	
Total Marks :		

In the table below 'Total Mark' records the mark scored by this candidate. 'Max Mark' records the Maximum Mark available for the question.

<u>๛๛๛๛๛๛๛๛๛๛๛๛๛๛๛๛๛๛๛๛๛๛</u>

Question	Part	
1	a	Depression is an example of a disorder that
		doesn't need a biological treatment. A non-biological
	<u>, , , , , , , , , , , , , , , , , , , </u>	treatment for depression can be therapy, through
		speaking to a doctor or counsellor. This method of
	`- -	treatment can allow patients to clear their neads
<u> </u>	· 1 ·	and possibly find the underlying cours of their
		depression.
·		The second secon
1	ь	A strength of therapy and speaking to a
	.	counsellor is that you can avoid the use of drug
	<u>, , , , , , , , , , , , , , , , , , , </u>	treatments; this is beneficial as drugs are
		expensive but patience and have the risk of becoming
	الموجود م	dependant and/or addicted to the drug. A weakness
		on the other hand is that the treatment may not
	N	work for that individual; this would be a waste
		of moush and botentially the botisate dirocast
		could become worse.
	,	
2	Q	Szasz depends the claim that "there is no such
		thing as mental illness" by saying that everyone
*		has their own idividual differences, they may just
<u>; </u>		deviate from the typical social norm.
:		
2	b	Szasz stated that "there is no such thing as
		mental illness" saying those people chose to act
		differently in terms of the "social norm".
		However it can be argued against as people
	• ,	with revere mental illness are shown to have
		this prom bith, showing early behavioural signs
-	,

Question	Part	
		and symptons. The biological area can also argue
	7 3 7 3	against this statement, showing differences (in
		brain structure for example) between those mentally.
, , , , , ,	· · · · ·	ill and those not; as it is clear evidence that
		mental illness exists.
, 	· _ •	the state of the s
3		The key research by Rosenhan (1973) contributes
		to an understanding of individual, social and
	,	cultural daversity. This is because it wooks at
<u> </u>		how behaviours and other characteristics airrer
,		according to what is viewed as normal and/or
		expected. It shows that these very between different
<u>}</u> -	. 42	individuals, the society they live in and the
		culture they're from. We understand that the
	4	présence is diversity is due to the différent
	<u> </u>	behaviours that can be shown or earnot be
<u> </u>	<u>, , , , , , , , , , , , , , , , , , , </u>	Shown.
, *	<u>, , , , , , , , , , , , , , , , , , , </u>	
4*		Explanations of mental health can be seen
,	_	as very determinist; with every guideline being
, ,		set on a piece of paper and stuck to regardiess
:		or berrough circumstance petientou bon example
		is diagnosed using a basic list of symptons,
		with a person being diagnosed if they hold a
. t		certain number of there; there symptom will
		often link to other health issues, like iron
		difficiancy for example. Once diagnosed, the
- , - 1		mental Whest may stay will you posever, like a
		sticker that determines who you are and what

<u>ჿჾჿჾჿჾჿჾჿჾჿჾჿჾჿჾჿჾჾჾჾჾჾჾჾჾჾჾჾჾჾჾჾჾჾჾ</u>

Question	Part	
	ر دف بـ د	your require. Most explanations of mental
		where are determinist as they are all referred
	, <u>; </u>	back to one initial cause, which lin't the
<u> </u>	· · <u>· · · · · · · · · · · · · · · · · ·</u>	ease for an patients.
		the state of the s
	-1	Option 2 - Criminal Psychology
	·	the state of the s
6	, a*	. The key research by Dixon et al. (2002) helped
		to explain how the characteristics of a
	<u>.t</u>	defendant can affect whether they are round
·		quilty. In this research the researchers took
		a group of ceriminals, each with different looks
	. 4 -	and reatures, people ca july then had to
· :		state in they were guilty or innocent. It was
'		found that those who are better looking (more
, ,		handrome or beautiful) were most likely to be
		found innocent, compared to there who locked
<u> </u>		"more criminal" (scary andlor intimidating) with
,	<u> </u>	scars and very many faces. Women are found
, , , }	,	not guilty more opten than men also, being
		considered a less criminal sex. However, once evidence
·		and witnesses are bought forward characteristics
	, ,	will often be over-rode.
<u>s</u>		the state of the s
<u>6</u>	b*	There are many different ethical considerations
-,	•	that must be thought about during research
·		into psychology and the courtroom. The most
	-	important would be safety, of both the researcher
		and those being studied and observed, criminal

Question	Part	· · · · · · · · · · · · · · · · · · ·
	, .	can be very unpredictable; being a danger to
		themselves and those around them. There shows be
÷		restrictions and rules to ensure everything in sace, I
		for example, communication through glav panels to
		avoid physical contact as west as monitoring and
		security by guards. Privacy and convent is also
		important, this is something that everyone is
		entitled to (even the criminal being studied) evidence,
		witnesses and additional information must all be
ام - ، م	1	protected and kept secret, unless permuted otherwise, n
,		level of respect must also be - kept, as interopolation an
1		direspect can each as emotional triggers and
,	1	coure issues.
		the state of the s
6	_c*	In order for Alan to improve juy decision-making
	, ,	a psychologist may suggest a number of things.
	-	The fust may be to add more of a variety of
	-	people to the jury, giving a bigger mix or
	-	opinions and personal beliefs. It may also be good
,. , <u>,</u>	1	to analyte verdicts personally, and not allowing
	I ₹.	each member of the jury to share final verdict
	-	with eachother, as this may cause a dominoe
	1 .	effect in each perion being infrinenced and agreeing
		with this recolict biarly. If the juries are giving
	ا د د د د	the wrong verdict the judge can avoibe
		incouraged to recognise this and override the
	·	veidict given with their own, more processional
	·	and experienced one.

		Option 3 - Environmental Psychology
·	. Ant & . 'Y	the same of the sa
7	·Q [₹]	The key research by Ulrich (1984) could be
	•	used to inpluence the design of hospitals. This
, , , , ,		is because the research looked at the effects
		of the window view for presence of a window
	<u> </u>	on the recovery time and happiness of
	· · · · · · · · · · · · · · · · · · ·	a patient staying in the hospital It was shown
	· · · · · · · · · · · · · · · · · · ·	in Ultichs results that patients with a rural
* ; ; ;	· ^ · · · · · · · · · · · · · · · · · ·	view (trees or a park) were generally happier
		than those with and shad a speedier recovery
	, , , ,	than those with an urban view (a brick wall
	<u>.</u>	or other buildings) and even those with no
		window at all. As a result of this research
1	,	hospitais may be designed to have more windows,
		with more pleaning and relaxing views to
		increase patients happiness and more preasant
- 1	<u> </u>	recovery and stay.
		Control of the contro
7	_b*	Research into psychological effects of the built
		environment may not always be very valid. This is
		because most of that is being observed will
	,.	be incluenced by other pactors rather than the
		built environment alone. For example, crune
		rates in an area will effect those who live
		there in regards to their levels of pear and
		stress. Having loud noises around will also
		impact different people in different ways.
		Overall the research lacks some validity due

Question	Part	
		to the effect of extraneous variables that
		cannot be convoiled by the researcher.
	н	
	, , , , , , , , , , , , , , , , , , ,	
7	<u>C</u> *	There are suggestions that a psychologist could
		make about now Jon can achieve his aim of
	<u></u>	designing a new part of town so that it has
		a paritive effect on the health wellbeing of
		the people who will live there. It would first
		be advised to avoid high rise buildings, this is
	•	because they create a kind of black or
,		segregation between weath groups and
		classes. They are also more likely to spread pie
	•	from one place to the next early, this risk cun
		cause fear and sixess to those living there. It is
	·····	vital to have alot of greenspaces too, for example
		parks, at this helps people to relax while bringing
		positivity and also making for cleaner, les polluted
		air as carbon dioxide is absorbed; this will improve
	 -	peoples health and wellheing.
		,
-		
	·····
