## Wednesday 16 May 2018 – Morning

### AS GCE MATHEMATICS

4721/01 Core Mathematics 1

#### QUESTION PAPER

Candidates answer on the Printed Answer Book.

**OCR supplied materials:**

- Printed Answer Book 4721/01
- List of Formulae (MF1)

**Other materials required:**

None

**Duration:** 1 hour 30 minutes

#### INSTRUCTIONS TO CANDIDATES

These instructions are the same on the Printed Answer Book and the Question Paper.

- The Question Paper will be found inside the Printed Answer Book.
- Write your name, centre number and candidate number in the spaces provided on the Printed Answer Book. Please write clearly and in capital letters.
- **Write your answer to each question in the space provided in the Printed Answer Book.** If additional space is required, you should use the lined page(s) at the end of the Printed Answer Book. The question number(s) must be clearly shown.
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Answer **all** the questions.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Do **not** write in the barcodes.
- You are **not** permitted to use a calculator in this paper.
- Give non-exact numerical answers correct to 3 significant figures unless a different degree of accuracy is specified in the question or is clearly appropriate.

#### INFORMATION FOR CANDIDATES

This information is the same on the Printed Answer Book and the Question Paper.

- The number of marks is given in brackets [ ] at the end of each question or part question on the Question Paper.
- **You are reminded of the need for clear presentation in your answers.**
- The total number of marks for this paper is **72**.
- The Printed Answer Book consists of **12** pages. The Question Paper consists of **4** pages. Any blank pages are indicated.

#### INSTRUCTION TO EXAMS OFFICER/INVIGILATOR

- Do not send this Question Paper for marking; it should be retained in the centre or recycled. Please contact OCR Copyright should you wish to re-use this document.

No calculator can be used for this paper

Answer **all** the questions.

- 1 Solve the equation  $(2 + \sqrt{5})x = 6 - \sqrt{5}$ , giving  $x$  in the form  $a + b\sqrt{5}$  where  $a$  and  $b$  are integers. [4]
- 2 The velocity of an object,  $v \text{ ms}^{-1}$ , at a time  $t$  seconds is given by
- $$v = 20t - 4t^2, \quad 0 \leq t \leq 5.$$
- (i) Find the rate of change of the velocity of the object with respect to time when  $t = 3$ . [3]
- (ii) Hence state, with a reason, whether the velocity of the object is increasing or decreasing when  $t = 3$ . [1]
- 3 Find the equation of the straight line that passes through the points  $(-1, 6)$  and  $(3, 4)$ , giving your answer in the form  $ax + by + c = 0$ , where  $a$ ,  $b$  and  $c$  are integers. [5]
- 4 Find the real values of  $x$  which satisfy the equation  $3x^4 - 7x^2 - 20 = 0$ . [5]
- 5 It is given that  $f(x) = 2x^{\frac{3}{2}} - 2x^2 + 10x$ .
- (i) Find  $f'(x)$  and  $f''(x)$ . [4]
- (ii) Evaluate  $f'(4)$  and  $f''(4)$ . Explain what your answers tell you about the graph of  $y = f(x)$  at the point where  $x = 4$ . [2]
- 6 (i) Sketch the curve  $y = \frac{3}{x}$ . [2]
- (ii) The curve  $y = \frac{3}{x}$  is translated by four units in the positive  $x$  direction. State the equation of the curve after it has been translated. [2]
- (iii) Describe fully a transformation that transforms the curve  $y = \frac{3}{x}$  to  $y = \frac{2}{x}$ . [2]
- 7 (i) Express  $-2x^2 - 16x - 9$  in the form  $a(x + b)^2 + c$ , where  $a$ ,  $b$  and  $c$  are integers. [4]
- (ii) Write down the maximum value of  $-2x^2 - 16x - 9$ . [1]
- (iii) State the equation of the line of symmetry of the curve  $y = -2x^2 - 16x - 9$ . [1]
- 8 The line  $y + 2x = 1$  meets the circle  $x^2 + y^2 = 13$  at the points  $A$  and  $B$ . Find the coordinates of the midpoint of  $AB$ . [7]
- 9 The equation  $kx^2 - 4x + 3k - 1 = 0$  has no real roots.
- (i) Show that  $3k^2 - k - 4 > 0$ . [3]
- (ii) Determine the possible values of  $k$ . [4]

10

The diagram shows part of the curve  $y = x^3 + px^2 + qx + r$ . The curve passes through the point  $(3, 0)$  and there is a maximum point at  $(-1, 0)$ . Find the values of  $p$ ,  $q$  and  $r$  and hence determine the coordinates of the minimum point of the curve. [9]

11 A circle has centre  $C(6, -3)$  and radius  $\sqrt{10}$ .

(i) Find the equation of the circle, giving your answer in the form  $x^2 + y^2 + ax + by + c = 0$ . [3]

(ii) Find an equation of the tangent to the circle at the point with coordinates  $(3, -2)$ . [5]

The point  $Q$  has coordinates  $(10, 1)$ .

(iii) Find the length of  $QC$ , giving your answer in simplified surd form. [2]

(iv) A tangent from  $Q$  to the circle meets the circle at  $T$ . Find the length of  $QT$ . [3]

**END OF QUESTION PAPER**

**Copyright Information**

OCR is committed to seeking permission to reproduce all third-party content that it uses in its assessment materials. OCR has attempted to identify and contact all copyright holders whose work is used in this paper. To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced in the OCR Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download from our public website ([www.ocr.org.uk](http://www.ocr.org.uk)) after the live examination series.

If OCR has unwittingly failed to correctly acknowledge or clear any third-party content in this assessment material, OCR will be happy to correct its mistake at the earliest possible opportunity.
